

DataHaven

SOLUTIONS

Database Administrator/ Engineer

ANNAPOLIS JUNCTION, MD.

If you are looking for a new opportunity with a small and growing company that offers extremely competitive compensation and a spectacular benefits package, then DataHaven Solutions might be the place for you. If you want to work for a company where you can actively participate in shaping the company's direction and whose owners are building a company that truly cares about their employees' happiness, then DataHaven Solutions is DEFINITELY the place for you.

We are looking for a talented Database Administrator with excellent problem-solving skills, to assist in monitoring system performance and resolving database related issues. Candidate should have an inquisitive nature, responsiveness, and willingness to work in a team environment.

Security Clearance:

An active Top Secret with full-scope poly U.S. Government security clearance is required.

Place of Performance:

Annapolis Junction, MD.

Required Skills:

- Bachelor's degree in technical discipline (i.e. computer science, engineering, mathematics, etc.). Educational requirements may be adjusted for 4 additional years of applicable work experience.
- 10 years technical experience
- 5 years of experience with Microsoft SQL Server
- Experience running custom SQL scripts
- Experience with Apache NiFi
- Experience with Idera database tools.
- Security +, CISSP, or other IAT Level II equivalent.

Desired Skills:

- Scripting experience is a huge plus.
